

# Have you had medical, dental or cosmetic treatments in Bangladesh, India and Pakistan?

If so, you could have been exposed to hepatitis C – a virus that can cause serious damage to your liver without you knowing.

Scan the QR code or search [hepc.co.uk](https://hepc.co.uk), then answer five short questions to find out if you or someone you care for should order a free blood test to check for hepatitis C.

The *Hep C, Ki?* campaign is developed and funded by Gilead Sciences Ltd.
